

DBMS 301: Assignment 1 - SQL Schema Design & 3NF Normalization

Relational Architecture | Maximum Marks: 100

Question 1: Functional Dependencies (40 Marks)

Given an unnormalized healthcare record schema, identify all candidate keys and minimal covers of functional dependencies.

Question 2: BCNF Decomposition (60 Marks)

Decompose the universal relation into Boyce-Codd Normal Form while ensuring lossless-join and dependency preservation properties.
